

Research to Practice

Inside Education Modified

Melissa Corto
CEO & Co-Founder
melissa@educationmodified.com

Our mission at Education Modified is to improve outcomes for students with diverse needs. Embedded in that mission is a dedication to connecting cognitive research to practical pedagogy.

1 Access and Consume

Education Modified believes that teachers should be able to easily access, consume and apply cutting-edge research into their daily practice. Currently it is very difficult and time consuming for teachers to find the latest, cutting-edge practices and strategies regarding special needs. Research is long and dense, and often not free for practitioners to use. Additionally, most research is conducted for knowledge generation, not for practical implementation. There is a need and opportunity to bridge this gap and help educators access information generated by scientists. Education Modified is tackling this head-on.

Research Illumination™

Education Modified carefully translates leading research into consumable pieces. Based on theories of cognitive load and evidence-based kernels, teachers can access & digest exactly what they need for their classroom practice.

EdModified transforms
LENGTHY
research findings ...

... into PRACTICAL and
FEASIBLE teaching
kernels ...

... and delivers them
to teachers' fingertips,
within their daily
workflow.
